

SPRAYDRIED EXTRACT

UNITAN ATO

“UNITAN ATO “ Quebracho extract has been chemically treated to transform the insolubles inherent in a natural Quebracho extract with the additional advantage of having been spraydried offering the highest tannin content among vegetable extracts.

Properties :

- Complete dissolution in cold water
- High tannin content
- Rapid penetration
- Excellent tanning properties;
- Non dusty
- Non astringent
- Good weight yield
- Full compatibility with vegetable tans and syntans

Usage:

UNITAN ATO may be used in all vegetable and mixed tanning and retanning processes, by itself or combined with other vegetable extracts or synthetic products. It is the most versatile vegetable extract and the most widely used in the world.

Typical Analysis per FILTER method

Physical Aspect	:	Reddish brown powder	
Tannin agents %	:	72.0 +- 2	Ph: 4.7 / 5.3
Water Max %	:	9.0	<u>Lovibond Colour</u> (obs):
			Red: 1.9 / 2.7
Ashes Max %	:	7.5	Yellow: 3.8 / 4.7

Packaging :

48 polipropylene/poliethylene bags x 25 kgs each one : palletized

Storage :

Storage in a dry, covered place with the original package is recommended
